

Performance Drug List

Effective: July 1, 2014

Physicians and Pharmacists: Please refer to this list when prescribing/dispensing medications.

All strengths and formulations of the medications listed within this document are considered preferred unless specifically noted. Some products may be covered at Non-preferred Branded Copay as determined by the plan's benefit design. Due to the constantly changing nature of drug therapy, the Formulary is a dynamic document and is subject to change without notice.

The **Performance Drug List** is a guide within select therapeutic categories for clients, plan participants and health care providers. **Generics should be considered the first line of prescribing.** If there is no generic available, there may be more than one brand-name medicine to treat a condition.

Member specific prescription benefit plan design may not cover certain categories, regardless of their appearance in this document.
